11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

Name: My Le

Title: Mr.

Organization/Artist Name: N/A

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

Organization/Artist Name: Sonic Bloom/Madeleine Bloom

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including independent dispute resolution via the National Arbitration Forum (NAF), [18] a Sunrise Challenge process and appropriate procedures to allow governments, public authorities or IGO's to challenge abuses of names with national or geographic significance;

14. has partnered with Afilias,[19] the backend registry provider for .ORG, to power .MUSIC domains. Afilias has the strongest background, track record and experience of any other .MUSIC backend registry provider. Afilias is the world's second largest Internet domain name registry with over than 20 million domain names under management, which is more than all other .MUSIC applicants combined; and

15. is accountable to the global Music Community through its Public Interest Commitments[20] that clarify its commitment to serve the global Music Community and public interest, while also addressing any concerns the Community may have.

---

[17] Registrants must comply with naming conditions only allowing them to legitimately register their own name while preventing illegitimate, bad faith registrations and user confusion. This phase provides better protection against abuse or impersonation, offers Community members a cost-effective alternative to the Sunrise phase (or an Early Access Program used by other registries) and helps spur adoption.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

Organization/Artist Name: BassFever

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including independent dispute resolution via the National Arbitration Forum (NAF), [18] a Sunrise Challenge process and appropriate procedures to allow governments, public authorities or IGO's to challenge abuses of names with national or geographic significance;

14. has partnered with Afilias,[19] the backend registry provider for .ORG, to power .MUSIC domains. Afilias has the strongest background, track record and experience of any other .MUSIC backend registry provider. Afilias is the world's second largest Internet domain name registry with over than 20 million domain names under management, which is more than all other .MUSIC applicants combined; and

15. is accountable to the global Music Community through its Public Interest Commitments[20] that clarify its commitment to serve the global Music Community and public interest, while also addressing any concerns the Community may have.

---

[17] Registrants must comply with naming conditions only allowing them to legitimately register their own name while preventing illegitimate, bad faith registrations and user confusion. This phase provides better protection against abuse or impersonation, offers Community members a cost-effective alternative to the Sunrise phase (or an Early Access Program used by other registries) and helps spur adoption.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

Title: Mr

Organization/Artist Name: Planet Joy Music

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

Organization/Artist Name: Fiona Bevan, Venus Climbing Records

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including independent dispute resolution via the National Arbitration Forum (NAF), [18] a Sunrise Challenge process and appropriate procedures to allow governments, public authorities or IGO's to challenge abuses of names with national or geographic significance;

14. has partnered with Afilias,[19] the backend registry provider for .ORG, to power .MUSIC domains. Afilias has the strongest background, track record and experience of any other .MUSIC backend registry provider. Afilias is the world's second largest Internet domain name registry with over than 20 million domain names under management, which is more than all other .MUSIC applicants combined; and

15. is accountable to the global Music Community through its Public Interest Commitments[20] that clarify its commitment to serve the global Music Community and public interest, while also addressing any concerns the Community may have.

---

[17] Registrants must comply with naming conditions only allowing them to legitimately register their own name while preventing illegitimate, bad faith registrations and user confusion. This phase provides better protection against abuse or impersonation, offers Community members a cost-effective alternative to the Sunrise phase (or an Early Access Program used by other registries) and helps spur adoption.

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including independent dispute resolution via the National Arbitration Forum (NAF), [18] a Sunrise Challenge process and appropriate procedures to allow governments, public authorities or IGO's to challenge abuses of names with national or geographic significance;

14. has partnered with Afilias,[19] the backend registry provider for .ORG, to power .MUSIC domains. Afilias has the strongest background, track record and experience of any other .MUSIC backend registry provider. Afilias is the world's second largest Internet domain name registry with over than 20 million domain names under management, which is more than all other .MUSIC applicants combined; and

15. is accountable to the global Music Community through its Public Interest Commitments[20] that clarify its commitment to serve the global Music Community and public interest, while also addressing any concerns the Community may have.

---

[17] Registrants must comply with naming conditions only allowing them to legitimately register their own name while preventing illegitimate, bad faith registrations and user confusion. This phase provides better protection against abuse or impersonation, offers Community members a cost-effective alternative to the Sunrise phase (or an Early Access Program used by other registries) and helps spur adoption.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

Organization/Artist Name: John Osborn

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

Organization/Artist Name: Adhelm

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including independent dispute resolution via the National Arbitration Forum (NAF), [18] a Sunrise Challenge process and appropriate procedures to allow governments, public authorities or IGO's to challenge abuses of names with national or geographic significance;

14. has partnered with Afilias,[19] the backend registry provider for .ORG, to power .MUSIC domains. Afilias has the strongest background, track record and experience of any other .MUSIC backend registry provider. Afilias is the world's second largest Internet domain name registry with over than 20 million domain names under management, which is more than all other .MUSIC applicants combined; and

15. is accountable to the global Music Community through its Public Interest Commitments[20] that clarify its commitment to serve the global Music Community and public interest, while also addressing any concerns the Community may have.

---

[17] Registrants must comply with naming conditions only allowing them to legitimately register their own name while preventing illegitimate, bad faith registrations and user confusion. This phase provides better protection against abuse or impersonation, offers Community members a cost-effective alternative to the Sunrise phase (or an Early Access Program used by other registries) and helps spur adoption.

Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

Organization/Artist Name: -

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including independent dispute resolution via the National Arbitration Forum (NAF), [18] a Sunrise Challenge process and appropriate procedures to allow governments, public authorities or IGO's to challenge abuses of names with national or geographic significance;

14. has partnered with Afilias,[19] the backend registry provider for .ORG, to power .MUSIC domains. Afilias has the strongest background, track record and experience of any other .MUSIC backend registry provider. Afilias is the world's second largest Internet domain name registry with over than 20 million domain names under management, which is more than all other .MUSIC applicants combined; and

15. is accountable to the global Music Community through its Public Interest Commitments[20] that clarify its commitment to serve the global Music Community and public interest, while also addressing any concerns the Community may have.

---

[17] Registrants must comply with naming conditions only allowing them to legitimately register their own name while preventing illegitimate, bad faith registrations and user confusion. This phase provides better protection against abuse or impersonation, offers Community members a cost-effective alternative to the Sunrise phase (or an Early Access Program used by other registries) and helps spur adoption.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community-based Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for DotMusic's .MUSIC community-based application. Furthermore, this Letter also "reject[s] the notion that there is no music community," a position that has been strongly voiced to ICANN and the EIU recently by members of the global music community and organizations with members representing a majority of music consumed globally. For the Letter of Support rationale, please read the subsequent pages.

Organization/Artist Name: Music community

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including independent dispute resolution via the National Arbitration Forum (NAF), [18] a Sunrise Challenge process and appropriate procedures to allow governments, public authorities or IGO's to challenge abuses of names with national or geographic significance;

14. has partnered with Afilias,[19] the backend registry provider for .ORG, to power .MUSIC domains. Afilias has the strongest background, track record and experience of any other .MUSIC backend registry provider. Afilias is the world's second largest Internet domain name registry with over than 20 million domain names under management, which is more than all other .MUSIC applicants combined; and

15. is accountable to the global Music Community through its Public Interest Commitments[20] that clarify its commitment to serve the global Music Community and public interest, while also addressing any concerns the Community may have.

---

[17] Registrants must comply with naming conditions only allowing them to legitimately register their own name while preventing illegitimate, bad faith registrations and user confusion. This phase provides better protection against abuse or impersonation, offers Community members a cost-effective alternative to the Sunrise phase (or an Early Access Program used by other registries) and helps spur adoption.

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

---

[7] The AGB also has no language disallowing membership based on participation in the community defined (e.g. in the prevailing .RADIO CPE Determination, the EIU was able to conclude that the .RADIO community is "clearly defined" and that, solely on the basis of being "participants in this clearly defined industry, they have an awareness and recognition of their inclusion in the industry community," Pg.2). Furthermore, a non-exhaustive list of membership criteria was allowed by the AGB, which may include: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (e.g. in the prevailing .HOTEL CPE Determination, the EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (e.g. in the prevailing .OSAKA CPE Determination, the EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (e.g. in the prevailing .ECO CPE Determination, the EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and

---

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including independent dispute resolution via the National Arbitration Forum (NAF), [18] a Sunrise Challenge process and appropriate procedures to allow governments, public authorities or IGO's to challenge abuses of names with national or geographic significance;

14. has partnered with Afilias,[19] the backend registry provider for .ORG, to power .MUSIC domains. Afilias has the strongest background, track record and experience of any other .MUSIC backend registry provider. Afilias is the world's second largest Internet domain name registry with over than 20 million domain names under management, which is more than all other .MUSIC applicants combined; and

15. is accountable to the global Music Community through its Public Interest Commitments[20] that clarify its commitment to serve the global Music Community and public interest, while also addressing any concerns the Community may have.

---

[17] Registrants must comply with naming conditions only allowing them to legitimately register their own name while preventing illegitimate, bad faith registrations and user confusion. This phase provides better protection against abuse or impersonation, offers Community members a cost-effective alternative to the Sunrise phase (or an Early Access Program used by other registries) and helps spur adoption.

Re: 110 new Support Letters for .MUSIC Community Application (ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit (EIU),

Attached are 110 new, independently-verified Letters of Support for DotMusic Limited's multi-stakeholder .MUSIC community application[1] for Question 20f,[2] including support from artists such as Marillion, Middle of the Road and many others. We request that this Letter is posted on ICANN's Correspondence page for the EIU and the Community Priority Evaluation (CPE) process.

We note that the support letters submitted prior to CPE commencement meet the requisite CPE criteria of "*multiple institutions/organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed*"[3] (DotMusic is supported by organizations with members representing over 95% of global music consumed). DotMusic support letters submitted by over 2000 relevant entities -- more than all of CPE applicants combined -- provide further evidence that DotMusic exceeds CPE criteria.

In conclusion, a multi-stakeholder community-model approach serves the common good, instills consumer trust and ensures mass industry adoption of .MUSIC that benefits both ICANN and the New gTLD Program. DotMusic looks forward to working with ICANN and community to ensure that the New gTLD Program meets its objectives, including driving adoption, increasing awareness and serving the public interest.

Re: Support for .MUSIC Community Application

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this of Letter of Support for the community-based DotMusic Application (ID 1-1115-14110)[1] for the .MUSIC top-level domain.

This Letter also rejects the notion that there is no music community. In fact, this global music community initiative to launch a trusted, safe and secure .MUSIC domain (that protects intellectual property and the rights of musicians) is supported by organizations with members representing over 95% of music consumed globally,[2] including the International Artist Organisation,[3] an umbrella association for national organisations mainly dedicated to the global music community by representing the rights and interests of music artists.

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 22 '15 ip: 97.95.203.96

Name: Estelle C. Erdmann

Organization/Artist Name/Self: Postles Lodge

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 23 '15 ip: 172.56.31.145

Name: David Klowden

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted , Dec 23 '15 ip: 97.90.115.207

Organization/Artist Name/Self: self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 23 '15 ip: 82.27.86.137

Name: Lucy Johns

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Kevin Ring Contact Information Redacted Dec 23 '15 ip: 108.70.148.40

Name: Kevin Ring

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Miranda Ostler Contact Information Redacted Dec 23 '15 ip: 86.128.191.249

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Reuben Wright Contact Information Redacted Dec 23 '15 ip: 82.237.180.189

Name: Reuben Wright

Organization/Artist Name/Self: Reuben Wright

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Greg McCarthy

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Wesley millan Contact Information Redacted Dec 23 '15 ip: 216.4.56.166

Name: Wesley Millan

Organization/Artist Name/Self: Wesley Millan

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 22 '15 ip: 94.197.121.139

Name: Derek Paice

Organization/Artist Name/Self: Deep Music

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Organization/Artist Name/Self: Dawn Lesley

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 24 '15 ip: 86.174.34.249

Name: Ian Souch

Organization/Artist Name/Self: Perpetual Motion

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 24 '15 ip: 77.100.203.84

Name: Nick Passmore

Organization/Artist Name/Self: Dot Music Limited

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 24 '15 ip: 81.155.61.143

Name: Jonathan Edwards

Organization/Artist Name/Self: Firefly Music / Panic Room / Luna Rossa

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 25 '15 ip: 41.13.191.101

Name: Lisa Theunissen

Organization/Artist Name/Self: Lisa Goldin

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Debra Lyons Contact Information Redacted Dec 25 '15 ip: 73.9.223.62

Name: Debra Lyons

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 25 '15 ip: 104.35.86.148

Name: Eddie Manzanares

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 25 '15 ip: 66.87.125.221

Name: Magi Lindeman

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Melanie Labaza Contact Information Redacted Dec 25 '15 ip: 45.52.143.29

Name: Melanie Labaza

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Randall Fink Contact Information Redacted Dec 26 '15 ip: 98.249.62.91

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: EMTEE ♡ Contact Information Reda Dec 25 '15 ip: 109.91.35.15

Name: Maurice

Organization/Artist Name/Self: Emtee

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Rachel Murphy Contact Information Redacted Dec 23 '15 ip: 212.159.167.125

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Kez Davies Contact Information Redacted Dec 18 '15 ip: 176.249.47.133

Name: Kerry Davies

Organization/Artist Name/Self: Imogen Heap

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Jan 1 '16 ip: 76.122.148.107

Name: Brieanne Tanner

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Jan 3 '16 ip: 81.136.122.62

Name: Liam Heys

Organization/Artist Name/Self: Liam H

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: D Bray Contact Information Redacted Jan 4 '16 ip: 194.60.136.6

Name: Darren Bray

Organization/Artist Name/Self: Megaspin

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Dec 28 '15 ip: 24.90.112.7

Organization/Artist Name/Self: Jomai Etu / the tribe of magic

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Jan 4 '16 ip: 205.201.211.78

Name: Randle Bollinger

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Frank t. Talton Contact Information Redacted Jan 5 '16 ip: 99.10.228.164

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Jan 9 '16 ip: 67.193.179.113

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Support for .MUSIC Community Application[1]

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support for the .MUSIC community application. The application meets the criteria to pass Community Priority Evaluation. This Letter also rejects the notion that there is no music community.

Signature: Contact Information Redacted Jan 6 '16 ip: 58.8.148.26

Name: Jasmine Friberg

Organization/Artist Name/Self: Self

[1] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails/1392, DotMusic Limited Application ID 1-1115-14110

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[2]

2. developed its Mission and Registration Policies using a consensus-driven, bottom-up methodology via feedback and universal principles collected in its ongoing, extensive public global communication outreach campaign launched in 2008 spanning hundreds of events and community meetings;[3]

3. is supported by an "(industry) community" of non-negligible, relevant organizations with members representing over 95% of music consumed globally (i.e. a majority of the Community defined), including many entities *mainly* dedicated to the Community, such as the IFPI,[4] IAO, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM, RIAA, NMPA and others.[5]

4. is the only .MUSIC applicant without a formal Community Objection filed against it;[6]

5. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

---

[2] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 18a and 20c

[3] http://music.us/events

[4] For example, the IFPI is considered an organization *mainly* dedicated to the Community defined because the IFPI administers the International Standard Recording Code (ISRC), the international identification system and global industry standard for sound recordings and music video recordings (See http://isrc.ifpi.org/en). The IFPI's activities serve the legitimate interests of the entire Community e.g. promoting the value of music, lobbying to serve the music sector's interests in government and legislative issues, and taking down mass copyright infringing websites illegally distributing music affiliated with the entire Community (See http://ifpi.org/what-we-do.php).

[5] http://music.us/supporters and https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadattachment/142588?t:ac=1392

[6] A few spurious opposition letters were recently filed for the purpose of obstruction just before the Community Priority Evaluation began despite the community application being public for comments for over 3 years. Such letters are considered irrelevant because they were orchestrated by competitors (See https://www.icann.org/en/system/files/correspondence/schaeffer-to-crocker-et-al-03nov15-en.pdf). The senders are negligible in terms of size or relevance with respect to music as determined by a web search on those entities i.e. none of these entities are globally-recognized music organizations of substantial size. The opposition is not of reasoned nature because it opposes ICANN-mandated Guidelines that community applicants must follow (e.g. Community eligibility policies must restrict membership to Community members). Such opposition is time-barred and has been developed with years of consultation with the ICANN Community. Pursuant to the Guidelines the DotMusic community application "has multiple organizations supporting the application, with documented support from organizations representing a majority of the overall community addressed" i.e. "has support from the majority of the recognized community member organizations."

6. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment[7]…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders;"[8]

7. has independent testimonies and disclosures from 43 experts, including 33 Ph.Ds, that provide evidence and "conclusions that are compelling and defensible"[9] that prove beyond reasonable doubt, that DotMusic's community-based application for .MUSIC exceeds the CPE criteria for *Community Establishment*, *Nexus* and *Support*, agreeing that the defined community is accurate and matches the applied-for string;[10]

8. has defined the Community consistently to match the string allowing all legitimate music constituents with the requisite awareness of the Community to be able to register a .MUSIC domain without a conflict of interest, over-reaching[11] or discrimination.

---

[7] Membership may be invoked based on participation in the defined community (See prevailing .RADIO CPE. The EIU concluded that the .RADIO community is "clearly defined" and that they have an awareness and recognition of their inclusion in the industry community" solely on the basis of being "participants in this clearly defined industry Pg.2). A non-exhaustive list of membership criteria is allowed by the AGB, including: (i) "a logical alliance members based on categories that are solely community-related" i.e. in the case of music, they are music-related (See prevailing .HOTEL CPE. The EIU awarded full points for Community Establishment for a community definition that is comprised of "categories [that] are a logical alliance of members," Pg. 2); (ii) "self-identification" in a community e.g. identifying that they have a tie with the community (See prevailing .OSAKA CPE. The EIU awarded full points for Community Establishment and Nexus for a community definition that stated that: "[m]embers of the community are defined as those who are within the Osaka geographical area as well as those who self identify as having a tie to Osaka, or the culture of Osaka. Major participants of the community include, but are not limited to the following: […] Entities, including natural persons who have a legitimate purpose in addressing the community," Pg. 2); (iii) allowing different types of membership just as long as there is demonstrable involvement in community-related activities that may vary among member constituent types (See prevailing .ECO CPE. The EIU awarded full points for Community Establishment stating that "the application dictates four types of members, whose cohesion and awareness is founded in their demonstrable involvement in environmental activities and who "demonstrate active commitment, practice and reporting." This involvement may vary among member categories," Pg.2); (iv) those who have a legitimate purpose in addressing the community e.g. by certifying to abide to a set of community-tailored registration requirements that are aligned with the goals of the community i.e. are aligned with the community's mission and purpose.

[8] https://gtldresult.icann.org/application-result/applicationstatus/applicationdetails:downloadapplication/1392?t:ac=1392, 20a

[9] CPE Guidelines, Pg.22, and CPE Panel Process Document, http://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf, Pg.3

[10] http://music.us/expert/letters

[11] According to Merriam-Webster dictionary, "substantial" is defined as "considerable in quantity: significantly great" (See, http://merriam-webster.com/dictionary/substantial, Definition 3b) or "being largely but not wholly that which is specified"). Section 1855(d)(2)(A) of the Balanced Budget Act of 1997 defined "substantial proportion" is "significantly more than the majority" (See http://gpo.gov/fdsys/pkg/FR-1998-04-14/html/98-9810.htm). DotMusic delineated the Community based on MCMO membership and/or NAICS "music" subset codes (Every NAICS code is preceded by "music" to ensure the string matches the community defined and exclude entities without an association or essential relationship with "music" i.e. casual entities without the requisite awareness or recognition of the community are excluded). The substantial majority of the Community is represented by "Musical groups and artists" category (NAICS code 711130) which alone considerably exceeds all the other delineated "music" NAICS subset codes (limited to only "music" entities) combined.

9. has provided an independent poll, conducted by independent polling organization Nielsen/Harris Poll, to address whether the string and DotMusic's defined community fulfill the "Nexus" criterion that requires that the string is commonly-known (i.e. known by most people[12]) and associated with the identification of the community defined. Most people, 1562 out of 2084 (i.e. 75% of the respondents) responded "Yes."[13] In conclusion, a majority of the general public agreed that DotMusic's associated definition of the community addressed (i.e. "a logical alliance of communities of individuals, organizations and business that relate to music"[14]) matches with the string;

10. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[15]

11. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting taking into consideration that Music is recognized by recent ICANN Resolutions and GAC Advice as a regulated, sensitive sector.[16] These enhanced safeguards include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication verification process; a priority-based launch phase[17] for Community members belonging to Music Community Member Organizations (MCMOs); naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List (GPML) to protect famous music brands;

12. mandates that all Community members must certify their agreement to the music-tailored DotMusic Registration Policies, including restricting Content and Use to legal, music-related content and activities and not allowing parking pages;

13. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its music-tailored .MUSIC

Re: Over 40 new Support Letters for DotMusic's .MUSIC Community-Based Application (Application ID 1-1115-14110)

Dear ICANN and Economist Intelligence Unit ("EIU"),

Please accept the attached, over 40 new Letters of Support for DotMusic Limited and its .MUSIC community-based application with ID 1-1115-14110.[1]

We kindly request that the attached Letters of Support be considered by the EIU Panel as an additional attachment and Letter of Support to Question 20f of the DotMusic application during the .MUSIC Community Priority Evaluation ("CPE") process.

As per the ICANN CPE FAQ,[2] we electronically submit the attached Letter of Support and request that it is posted on the ICANN Correspondence page.

Respectfully Submitted,

Paul Zamek

Re: Support for .MUSIC Community-based Application[1] with Enhanced Safeguards

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support which supports the responsible, trusted and safe operation of the .MUSIC top-level domain under a community TLD multi-stakeholder governance model with Enhanced Safeguards tailored to serve the legitimate interests of the entire global Music Community.

Respecting and protecting music rights serves both the global music community and the public interest. Our organization supports the position of the International Federation of the Phonographic Industry,[2] which endorses DotMusic because it has "publicly committed to, and will be bound to, implement meaningful and robust safeguards to protect against online infringement."[3] Our organization also supports the positions expressed in the letter[4] sent to ICANN (on March 5th, 2015) by Victoria Sheckler from the RIAA and on behalf of a global music community coalition representing "over 80% of the world's music," and the letter[5] sent to ICANN (on March 7th, 2015) by Rich Bengloff from the A2IM and on behalf of a majority of a global music community coalition representing a majority of the independent music community, to support the [DotMusic] "community" application for .MUSIC and that "we expect…the community application process…to have meaning and for the community preference criteria (CPE)…to be interpreted thoughtfully, diligently, and in a responsible manner in light of the public interest and with consumer safety in mind " and for ICANN "to expeditiously implement appropriate changes to address [concerns]." We also support the positions in the letter[6] sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a

6. is governed by the multi-stakeholder global Music Community with a diverse Policy Advisory Board encompassing commercial, non-commercial and amateur music-related constituent types;[12]

7. has enhanced safeguards to increase trust, protect copyright and prevent cybersquatting. These include: restricting eligibility to Community members with the requisite awareness of the Community defined without discrimination; only allowing legal music content and usage; no parking pages; stopping domain hopping; anti-piracy takedown policies; authorization provisions; permanent blocks; privacy/proxy provisions; true name/address mandates; trusted sender complaints; registrant validation via a mandatory two-step phone and email authentication process; a priority-based launch phase for Community members belonging to Music Community Member Organizations; naming conditions only allowing registrants to register their name, acronym or Doing Business As; and, a Globally Protected Marks List to protect famous music brands;

8. commits to implement both proactive and reactive enforcement measures, such as proactive zone screening, Community crowdsourced enforcement and random compliance checks, with appropriate appeals mechanisms to fix compliance issues under its .MUSIC Policy & Copyright Infringement Dispute Resolution Process (MPCIDRP), including independent dispute resolution via the National Arbitration Forum (NAF);[13] and

9. is accountable to the global Music Community through its Public Interest Commitments[14] that clarify its commitment to serve the global Music Community and public interest, while also addressing any concerns the Community may have.

Music is recognized by ICANN and GAC as a regulated sector, comprised of a logical alliance of interdependent communities relating to music with organized practices and institutions that enable and regulate the production, distribution and consumption of music.[15] As such, the string is aligned with DotMusic's Community definition ("a strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music"[16]). Its Nexus matches the applied-for string because it

represents the Community and allows all constituents to register a .MUSIC domain without any conflict of interests, over-reaching or discrimination.

DotMusic clearly exceeds the criteria required to pass Community Priority Evaluation, has provided music-tailored Public Interest Commitments, and responsibly serves a higher purpose to fulfill the Community's needs and legitimate interests.

Respectfully submitted,

Re: Support for .MUSIC Community-based Application[1] with Enhanced Safeguards

Dear ICANN and Economist Intelligence Unit ("EIU"):

Please accept this Letter of Support which supports the responsible, trusted and safe operation of the .MUSIC top-level domain under a community TLD multi-stakeholder governance model with Enhanced Safeguards tailored to serve the legitimate interests of the entire global Music Community.

Respecting and protecting music rights serves both the global music community and the public interest. Our organization supports the position of the International Federation of the Phonographic Industry,[2] which endorses DotMusic because it has "publicly committed to, and will be bound to, implement meaningful and robust safeguards to protect against online infringement."[3] Our organization also supports the positions expressed in the letter[4] sent to ICANN (on March 5th, 2015) by Victoria Sheckler from the RIAA and on behalf of a global music community coalition representing "over 80% of the world's music," and the letter[5] sent to ICANN (on March 7th, 2015) by Rich Bengloff from the A2IM and on behalf of a majority of a global music community coalition representing a majority of the independent music community, to support the [DotMusic] "community" application for .MUSIC and that "we expect…the community application process…to have meaning and for the community preference criteria (CPE)…to be interpreted thoughtfully, diligently, and in a responsible manner in light of the public interest and with consumer safety in mind " and for ICANN "to expeditiously implement appropriate changes to address [concerns]." We also support the positions in the letter[6] sent to ICANN (on April 14th, 2015) by Danielle Aguirre from the NMPA and on behalf of a music publisher and songwriter community coalition representing a

majority of the global music publishing community, which expressed their "support [for] the [DotMusic] .MUSIC community application because respecting and protecting music rights serves the global music community and the public interest."

Please accept this Letter of Support for DotMusic Limited's .MUSIC community-based application because DotMusic:

1. is the only .MUSIC applicant that follows unified principles, ideals and mission that the entire Community subscribes to, such as: creating a trusted identifier and safe haven for music consumption, protecting musicians' rights and intellectual property, fighting copyright infringement/piracy, supporting fair compensation and music education, and following a multi-stakeholder approach of representation of all types of global music constituents without discrimination;[7]

2. is supported by relevant organizations with members representing over 95% of music consumed globally (i.e. a majority), including many entities *mainly* dedicated to the Community, such as the IFPI, FIM, ICMP, IFACCA, IAMIC, ISME, A2IM, WIN, NAMM and others;[8]

3. is the only .MUSIC applicant without a formal Community Objection or any relevant, substantiated opposition files against it.[9] It is in the public interest that the Panel protects the legitimate interests of the global Music Community by invalidating any last minute spurious letter of opposition and clearly understands the objectives of such letters intended to unfairly disqualify this worthy, meaningful and well-intentioned community-based application supported by the majority of the Community;[10]

4. commits to align its music-tailored Registration Policies with its articulated community-based purpose to serve the legitimate interests of the Community;

5. commits to "use clear, organized, consistent and interrelated criteria to demonstrate Community Establishment…aligned with [its] community-based Purpose" and uphold its established Community definition of a "strictly delineated and organized community of individuals, organizations and business, a logical alliance of communities of similar nature that relate to music" that "encompasses global reaching commercial and non-commercial stakeholders, and amateur stakeholders."[11]
