Dear Sir / Madam

Re : TELNIC and their application for .tel TLD

We write, as a UK based Corporate ISP and ICANN accredited registrar with broad expertise in providing a range of advanced Internet based services to clients and business via fixed line, wireless and cellular networks, to show our support for the above application that you have been charged with evaluating.

We confirm that we have considered Telnic's application for the .tel top-level domain, and it is our opinion that this has the potential to open opportunities for new services to our customers. Furthermore, we are ready and able to exploit our expertise in the UK ENUM space and other advanced systems that could facilitate the delivery of services in this area, should the application be approved by ICANN.

We may, in due course, also be interested in playing a role in the .tel Policy Advisory Group, which we understand, would be put into place to assist in ensuring that the .tel TLD operates to the very highest standards and the very best interests of the .tel community as a whole.

Yours faithfully

Julian Rose
Technical Director
Atlas Internet

Adrian Snell
Commercial Director
