15 Plaintiff, if it pleases the court, then plaintiff wishes the court to quash and set aside defendants motion to dismiss
16 this action. Defendant through its council has offered several cites of case law to support its claim, however none
17 of these cites apply or are similar, whereas none of them have a mandate given by an agency of the Federal U S
18 government specifically to have some sort of domain over certain activities of each person involved with the
19 internet, by either its own presence or by segregates or agents to do its bidding. Thus defendant having such
20 actions mandated to it, and the ability of having any or some kind of influence in and for every jurisdiction,
21 everywhere it most then is responsible for its actions here and elsewhere.

22 Defendant being in clear violation, of that agreement, namely where defendant agrees to guard against internet
23 piracy of any kind, and were it has failed to do so.

24 Defendant also not answering to this compliant in a timely manner, and has failed to show any objection to it, or
25 any reason for any objection to it and also being in full knowledge of the matter at hand, thus plaintiff begs for the
26 court to set a side defendants motion.

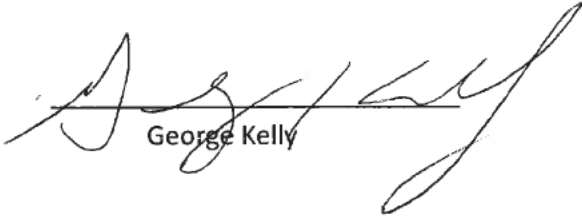

27 Further, plaintiff asks to discontinue its action in this court without prejudice, so as plaintiff then can re file its
28 claim in the defendant’s place of domicile. Such filing, subject to and upon the completion of another related
29 action, against an agent of ICANN.
