Dear Rod,

Re: .tel Internationalized Domain Names (IDNs)

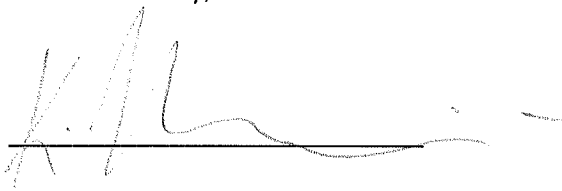

Telnic is committed to ensure the broadest possible reach of .tel domains to consumers worldwide. Accordingly, Telnic would like to implement Internationalized Domain Name registrations within the .tel Top Level Domain.

We hereby request the authorization of ICANN to release the domains that contain hyphens in the third and fourth positions from the pool of reserved names as specified in Appendix 6 of the .tel Registry Agreement.

Telnic will follow the "Guidelines for the Implementation of the Internationalized Domain Names" as published on the ICANN web site and will collaborate with other registries, the sponsored community and relevant stakeholders to further develop IDN-specific registration policies for the benefit of DNS users worldwide.

We look forward to receiving your considered reply.

Yours sincerely,

Khashayar Mahdavi  
CEO  
Telnic Ltd.
