Who supports .ISLAM and .HALAL new gTLDs?

.ISLAM and .HALAL new gTLDs, applied for through Asia Green IT System have received several endorsement letters from different Islamic organizations and famous people around the world, and from different branches of Islam (Shia and Sunni as the main branches).

AGIT as the Muslim company applying for .ISLAM and .HALAL gTLDs, has an ongoing task to promote .ISLAM and .HALAL new gTLDs to the Muslim community to receive new supporting letters.

As a strategic approach, AGIT is trying to make International Islamic organizations like Organization of Islamic Cooperation (OIC), or Islamic Chamber of Commerce and Industry (ICCI) to be involved in the governance of .ISLAM and major Halal certification bodies to be involved in .HALAL policy making. Although it is hard to contact such huge organizations (OIC is the second largest international organization after UN), and very hard to explain the concept of TLD in their managerial positions (since most of high level managers in these organizations forward our letters to lower technical staff considering them as less important

Contact Information Redacted

and more technical cases), but eventually we found the correct entities to sponsor .ISLAM and .HALAL gTLDs in terms of making decisions and policy making. After many meetings we have recently been succeeded in getting **Islamic Chamber Research and Information Center (ICRIC)**'s supporting letter for .ISLAM. Earlier we have also been succeeded in involving HALALWORLD, the only HALAL certification body which is accepted by all Islamic countries. (There are many Halal certification bodies around the world but all of them are supported by one or few countries. HALALWORLD is OIC's Halal certification standard project which is accepted by all Islamic countries)

Since getting the supporting letter, our decisions with them has improved in principle agreement of ICRIC-OIC to become a partner in the project and take a leadership role beyond support.

In particular they could act as a potential sponsoring organization. We currently are working out the formalities of such relationship.

Islamic Chamber Research and Information Center (ICRIC) in association with the **Islamic Chamber of Commerce and Industry (ICCI)** which is under the umbrella of the **Organization of the Islamic Cooperation (OIC)** was established in 2003. ICRIC has a Board of directors consisting of 9 members from Malaysia, Jordan, Iran and Egypt plus Secretary General of ICCI and acts within the framework of its articles of association approved by the Islamic Chamber and with regard to 16 strategic principles included in its mandate for elevation of trade and economic ties among Islamic Countries.

AGIT has also recently started to open the opportunity to Muslim people to express their interest in .ISLAM and .HALAL gTLDs through online social media like Facebook (<https://www.facebook.com/DotIslam>) and (<https://www.facebook.com/GotHalal>) with thousands of fans.

1. Major Organizations / Associations / Leaders representing Muslim populations:

1.1. Islamic Chamber Research and Information Center (ICRIC) (.ISLAM and .HALAL)

ICRIC is a subsidiary of **Islamic Chamber of Commerce and Industry (ICCI)** which is under the umbrella of **Organization of Islamic Cooperation (OIC)**², the 2nd largest international organization after UN with 57 Islamic member countries. ICRIC is responsible for research and information activities of ICCI and operates some of OIC and ICCI's projects. OIC has created ICCI in line with the goal of development for all Islamic communities, and its continuous consideration on the promotion of commercial and economic relations among its Member States to achieve the goal of sustainable and comprehensive development. ICRIC acts as the research and development wing of ICCI in terms of new ideas and technologies, so when contacting OIC's different sections, we were forwarded to ICRIC as the most relevant subsidiary of OIC and ICCI.

After several meetings with the general secretariat of ICRIC, we finally got their support of .ISLAM new gTLD, but we still have more negotiations to establish a formal cooperation in the governance of .ISLAM (maybe as one of their projects).

Dr. Mahathir was one of the first who supported us and his support has brought a great credit for AGIT, because everybody knows that he will not support a non-eligible entity to hold the sensitive TLD of .ISLAM.

Malaysia has a 17 million Muslim population⁴ and we believe Dr. Mahathir Bin Mohamad is the best representative of this community.

Shia's population is around 200 Million⁵. 85% of them (170 Million) are **Twelver** or **Imami Shia's**. All Imami Shīa's follow the thoughts of religious leaders which are trained in schools of thoughts in different countries under the supervision of this center. This center is the main training management system of Shia schools in terms of religious content and can be counted as the representative of **170 million Twelver or Imami Shia's** around the world.

Making them attracted to support .ISLAM was hard and time consuming process, following their deep investigations on the eligibility of AGIT to operate .ISLAM TLD.
